Klearpath Analytics

Turning Complexity Into Clarity

Klearpath Analytics delivers transformative, data-driven solutions tailored to help organizations achieve clarity, operational efficiency, and strategic advantage. We specialize in integrating Microsoft technologies, crafting compelling data stories, and designing digital solutions that simplify complexity.

Why Choose Us

Microsoft Ecosystem Experts

From Power BI to Power Automate, our solutions are built to integrate, automate, and scale using the full Microsoft stack.

Executive-Level Service

Your mission is our mission. No handoffs, no delays, just expert attention from day one.

Flexible, Scalable Delivery

Whether you need a quick-turn dashboard or long-term support, our pricing and delivery adapt to your needs.

Financial & Analytical Depth

We go beyond dashboards. We build tools that drive funding decisions, ensure compliance, and support strategic planning.

Our Services

Dashboards

- Build executive-ready Power BI dashboards
- Transform raw data into clear visual narratives
- Align visuals with mission goals and stakeholder needs
- Apply best practices in data visualization

Microsoft Power Platform

- Develop Power Apps and automated workflows
- Integrate Power BI with SharePoint and Excel
- Streamline manual tasks and reduce reporting delays
- Align platform tools with federal financial processes

Finance & Budget Support

- Provide data-driven forecasting and spend plans
- Support budget formulation and execution tracking
- Create compliance-ready financial reports
- Deliver audit-friendly documentation and insights

SOP & Digital Documentation

- Write clear, tailored standard operating procedures
- Capture critical workflows and approvals
- Support onboarding and knowledge transfer
- Ensure consistency and compliance across teams

AI Enablement

Practical AI support that helps teams use data and automation with confidence, with clear governance and human oversight.

Data Governance & Management

Clear ownership, quality, and controls for your data, so reports and decisions can be trusted.

Data Automation

Automated data flows and reporting that cut manual work and keep information current.

Rapid Prototyping

Working prototypes built quickly, so you can see and test a solution before committing to a full build.

KlearPath Academy

Professional training that builds data, Power BI, and Power Platform skills across your team.

Data Storytelling

Clear, compelling visual stories from complex data, built for executives and teams to act on.
